

MADE FOR PHARMA LABS

Trusted Tips for Critical Pharma Applications

[SHOP NOW](#)

Precision matters in pharmaceutical research and production. And delays are never an option.

That's why Avantor® offers a wide selection of pipettor tips designed to support demanding pharma workflows. From drug formulation and analytical testing to batch release and QA/QC, you'll find tips that meet your lab's sterility, accuracy and throughput needs.

Choose from filtered, sterile, low-retention and robotic-compatible tips, all available from the brands you trust. So whether you're using universal or application-specific pipettors, Avantor can help keep your work moving on schedule with quick delivery and broad compatibility.

Applications include:

- Analytical and microbiological testing
- Formulation and process development
- QA/QC in manufacturing
- Genomics and molecular R&D

When timing and compliance are critical, the right tip makes all the difference.

Choose the tips you need

Avantor carries a comprehensive selection of tips so you can choose what fits your application:

General purpose tips

Ideal for routine pipetting tasks in pharma labs, including sample prep, dilutions and solution transfers. Available in sterile and non-sterile formats.

Dispenser tips

Reliable tips for bulk reagent distribution, buffer transfers and repetitive dosing in formulation and manufacturing.

Reservoirs

Designed to reduce dead volume and support multi-channel pipetting. Ideal for high-efficiency liquid transfers in QC labs and cleanroom.

Pipette Calibration Services

Pipette calibration ensures accuracy to meet compliance standards. Includes:

- Proven and verified quality
- Detailed process documentation
- All liquid handling instruments including glassware
- All types of examinations including customer specifications
- Calibration with certification up to and including a UKAS certificate
- As-found and as-left certificates
- Use of original manufacturer spare parts

Count on Avantor® pipette calibration services for the fast, reliable and expert support you need to ensure that your instruments are calibrated and fully compliant to the highest standards. This includes onsite calibration options when you have large numbers of pipettes that need calibration support.
