

KEEP WORK ON TRACK

Your Best Productivity Tool is a Full Supply Cabinet

[LEARN MORE](#)

Your bench time is precious. And nothing can kill your momentum faster than realizing you're short on something basic halfway through a run.

You've already thought through the protocol. The cells are behaving and happy. The last thing you want is to stop and hunt for flasks or filtration supplies that should have been there in the first place.

VWR[®], part of Avantor[®] can keep your cell culture workflows stocked with the consumables you use every day. Plasticware and glassware, liquid handling tools, filtration products and general lab essentials. They're all available from one source you already trust.

That means fewer supply substitutions, fewer workarounds and fewer "I'll finish this tomorrow" moments.

Our North American distribution network means we can quickly deliver the supplies you need. That means your experiments can stay on schedule. No delays. No starting over. No lost time.

Your cells will notice your delays, so give yourself more time at the bench and reduce interruptions along the way.

Take a look at what's available to see how we can help make your next run go smoother.
